

# MAJOR SUBDIVISIONS

The number of new major subdivisions approved yearly has remained steady since 2004, as well as the number of new lots created. There were thirteen (13) major subdivisions approved in 2006 with a total of 301 new lots.

In addition to the newly created lots, construction also continued on lots approved in prior years. Of the 159 building permits for site-built homes approved in 2006, 113 were for lots in major subdivisions.
