

MAJOR SUBDIVISIONS

In 2007, there were seven (7) major subdivisions approved with a total of 208 new lots. The yearly totals of new major subdivisions since 1990 has fluctuated year to year.

As the population of Putnam County grows steadily each year, construction on newly created lots, as well as lots created in prior years, continues at a steady pace. The previous three years had forty-two (42) major subdivisions with 1,015 lots approved. These subdivisions are still being developed. Of the 152 residential permits for site-built homes approved in 2007, 110 were for lots in major subdivisions.
